

Ergonomics seating

Ergonomics has been the buzz words of the 90's, yet how much do we really know about the true ergonomics seating position? The best way of sitting in a healthier position is to sit on a properly designed chair that maintains the natural S-shape of the spine.

The TAZ series is designed according to these ergonomics principles, couples with the "permanent contact" mechanism to ensure continuous lumbar support and molded PU foam for extra comfort. TAZ chair is indeed the choice for today's office.
